Education

Bachelor of Computer Science (Honours) Jan. 2022 – Dec. 2026 (Expected)
University of Manitoba *Winnipeg, MB*

- International Undergraduate Student Scholarship
- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Database Management Systems, Distributed Computing, Object-Oriented Programming, Operating Systems, Human-Computer Interaction

Technical Skills

Languages: Java, TypeScript, JavaScript, Python, C, C++, C#, SQL, HTML, CSS
Frameworks & Libraries: Spring Boot, React, Next.js, Node.js, .NET, Tailwind CSS, JUnit
Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD
Developer Tools & Databases: Git, GitHub, PostgreSQL, Postman, VS Code, IntelliJ IDEA, Android Studio, Codex, Claude Code

Projects

AI-Assisted Employee Scheduler | *Java, Spring Boot, React, TypeScript, PostgreSQL, Groq API, GitHub Actions*

- Engineered a **full-stack, AI-assisted workforce scheduling platform** adopted by a supermarket in Nigeria to manage scheduling for **15 employees**, **reducing scheduling time by 75%**.
- Integrated the **Groq API** to translate natural-language staffing requests into structured requirements, with a **scheduling algorithm** enforcing availability, shift conflicts, and weekly-hour limits.
- Implemented **CI/CD pipelines** using **GitHub Actions**, with **automated frontend and backend testing** to validate code changes.

Grocery App | *Java, Spring Boot, React, PostgreSQL, Docker, Vercel, Render*

- Developed a **full-stack household grocery management application** serving **8 real users**, enabling shared shopping lists to help **prevent duplicate purchases**.
- Built secure **REST APIs** with **JWT authentication**, **role-based household access**, shared grocery lists, and purchase tracking.
- Containerized the **Spring Boot** backend with **Docker** and **deployed** the application using **Vercel**, **Render**, and **Neon PostgreSQL**.

PawSignal – AI-Powered Animal Welfare Analytics | *Next.js, TypeScript, PostgreSQL, Prisma, Groq API, Leaflet*

- Collaborated in a **hackathon team** to develop an **AI-powered platform** transforming municipal animal-service data into actionable insights.
- Implemented **statistical analysis** to identify **geographic hotspots, seasonal anomalies, and historical trends**, supporting data-driven resource planning.
- Integrated the **Groq API** to generate **AI-driven recommendations** and implemented **10-minute caching** to reduce redundant API processing.

Experience

Undergraduate Student Research Assistant (USRA) May 2026 – Aug. 2026
University of Manitoba *Winnipeg, MB*

- Designed a **human-computer interaction (HCI) study** investigating the effects of trash talk on gameplay behaviour and player re-engagement in **UFC 5**, developing experimental procedures, questionnaires, and interview protocols.
- Conducted a **pilot study with 6 participants** to evaluate experimental procedures and identify usability issues; prepared and submitted a **Research Ethics Board (REB) application**.

Map Services Assistant Oct. 2023 – Mar. 2026
Canada Map Sales, Government of Manitoba *Winnipeg, MB*

- Maintained **500+ records** and digitized **5,000+ maps**, improving data accuracy, accessibility, and organization.
- Managed **20–30 daily customer inquiries** and processed **20+ weekly orders**, resolving issues while maintaining accurate records and operational efficiency.
